

# Creating Software Solutions fast and efficient

view my works

## About Me

Hey!! I am Charles Nathaniel B. Togle, a 2nd-year Computer Science student at the University of Makati. I have a passion for creating web applications and an interest in developing desktop applications. I love working on projects that enhance user experience seamlessly. I learn best through hands-on experience and am always eager to explore new concepts. I am also a quick learner and open to new challenges!

## Programming Experiences

HTML      PHP      C#  
CSS      MySQL      Python  
JavaScript      ReactJS

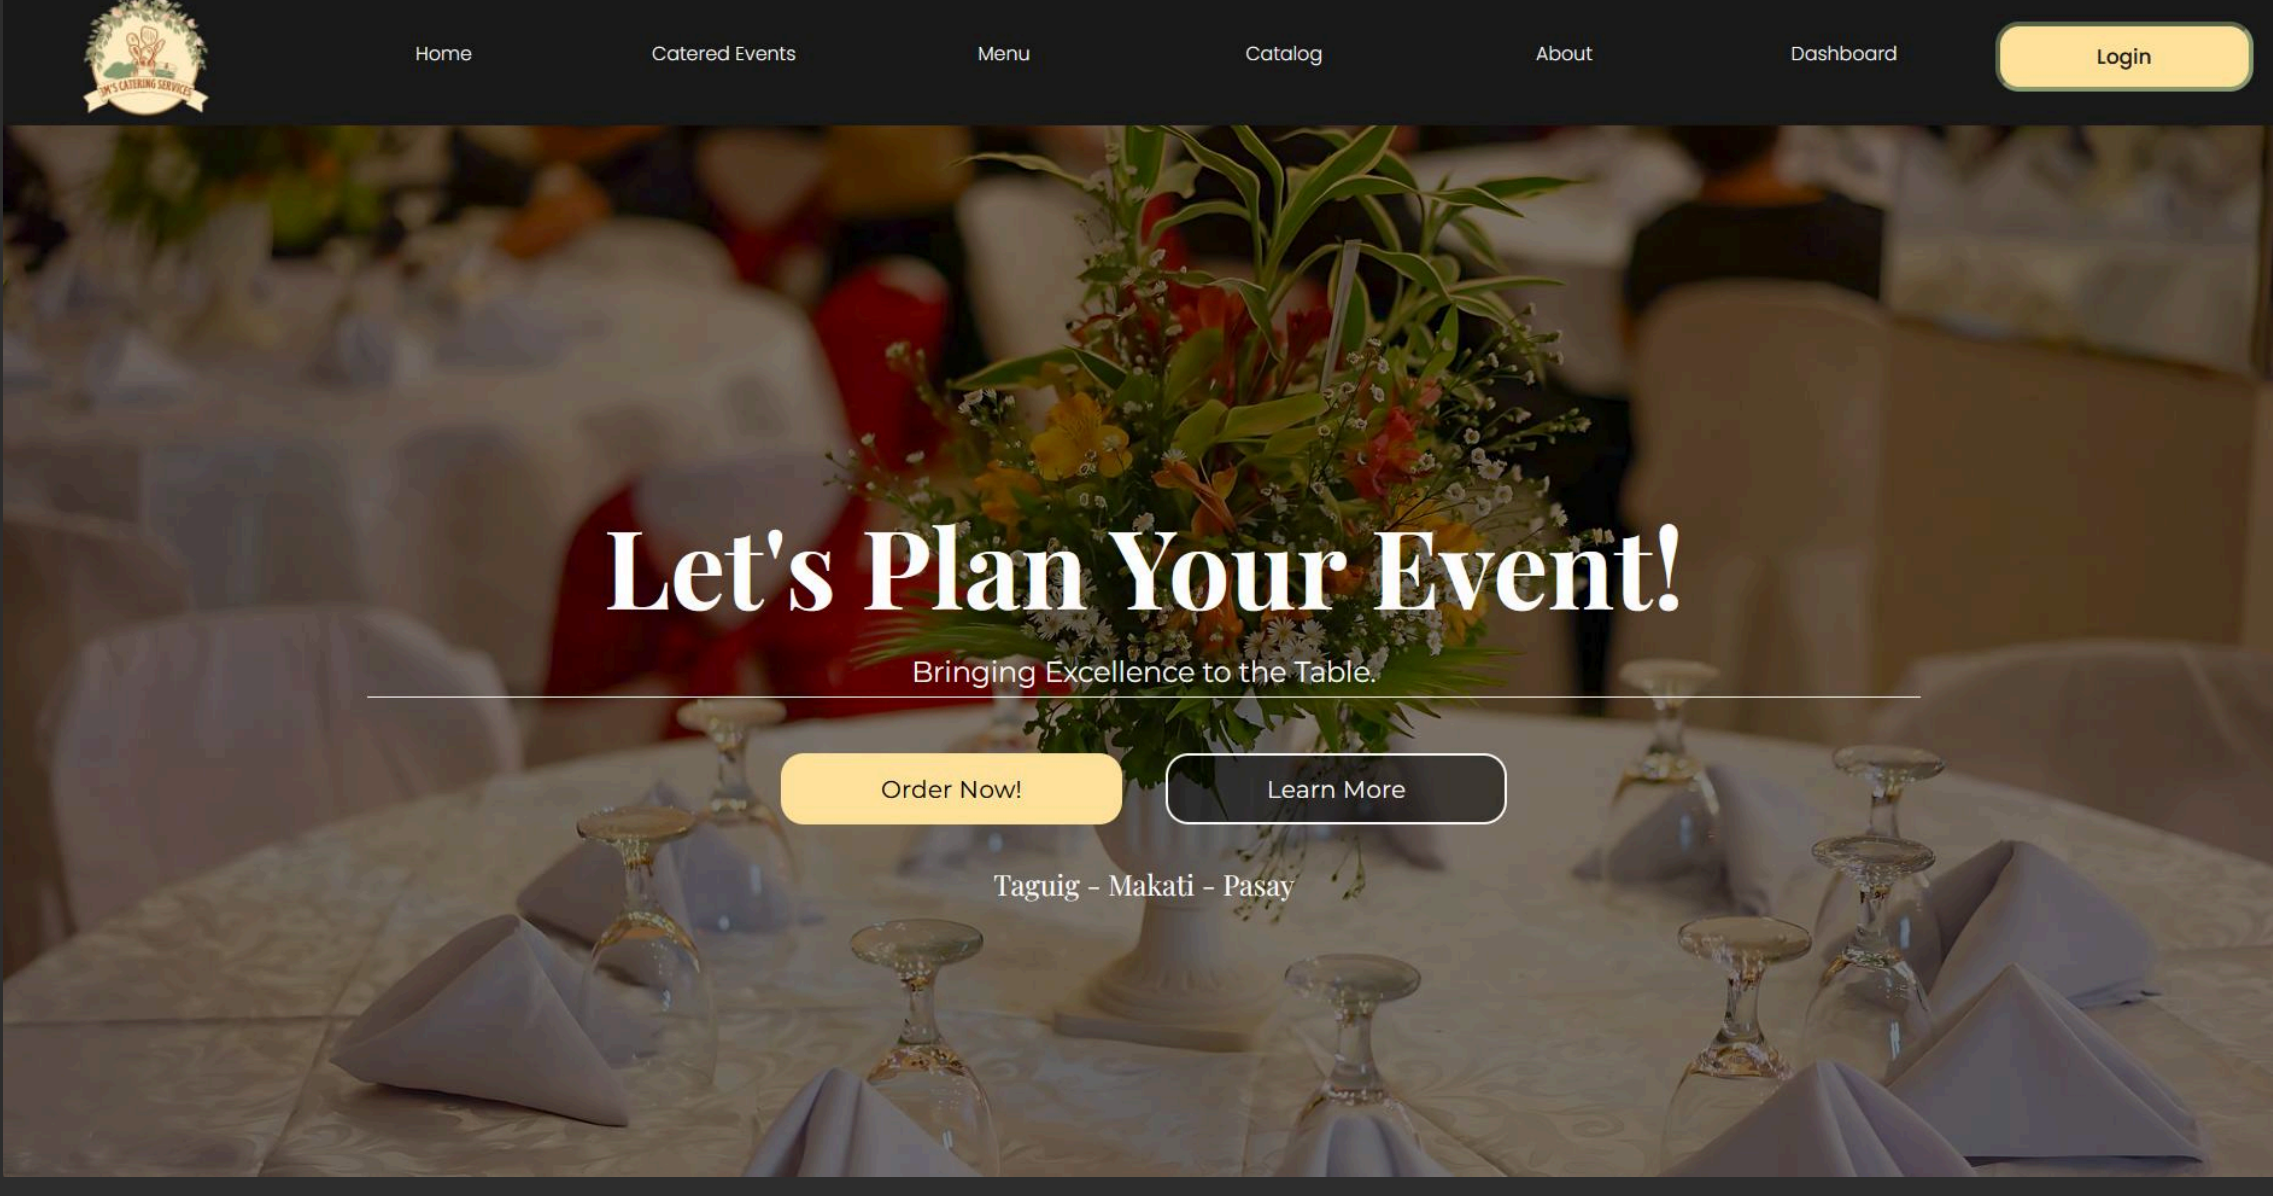

## Tools

GitHub      Microsoft SQL Server  
GitHub Desktop      Node Package Manager

# Projects

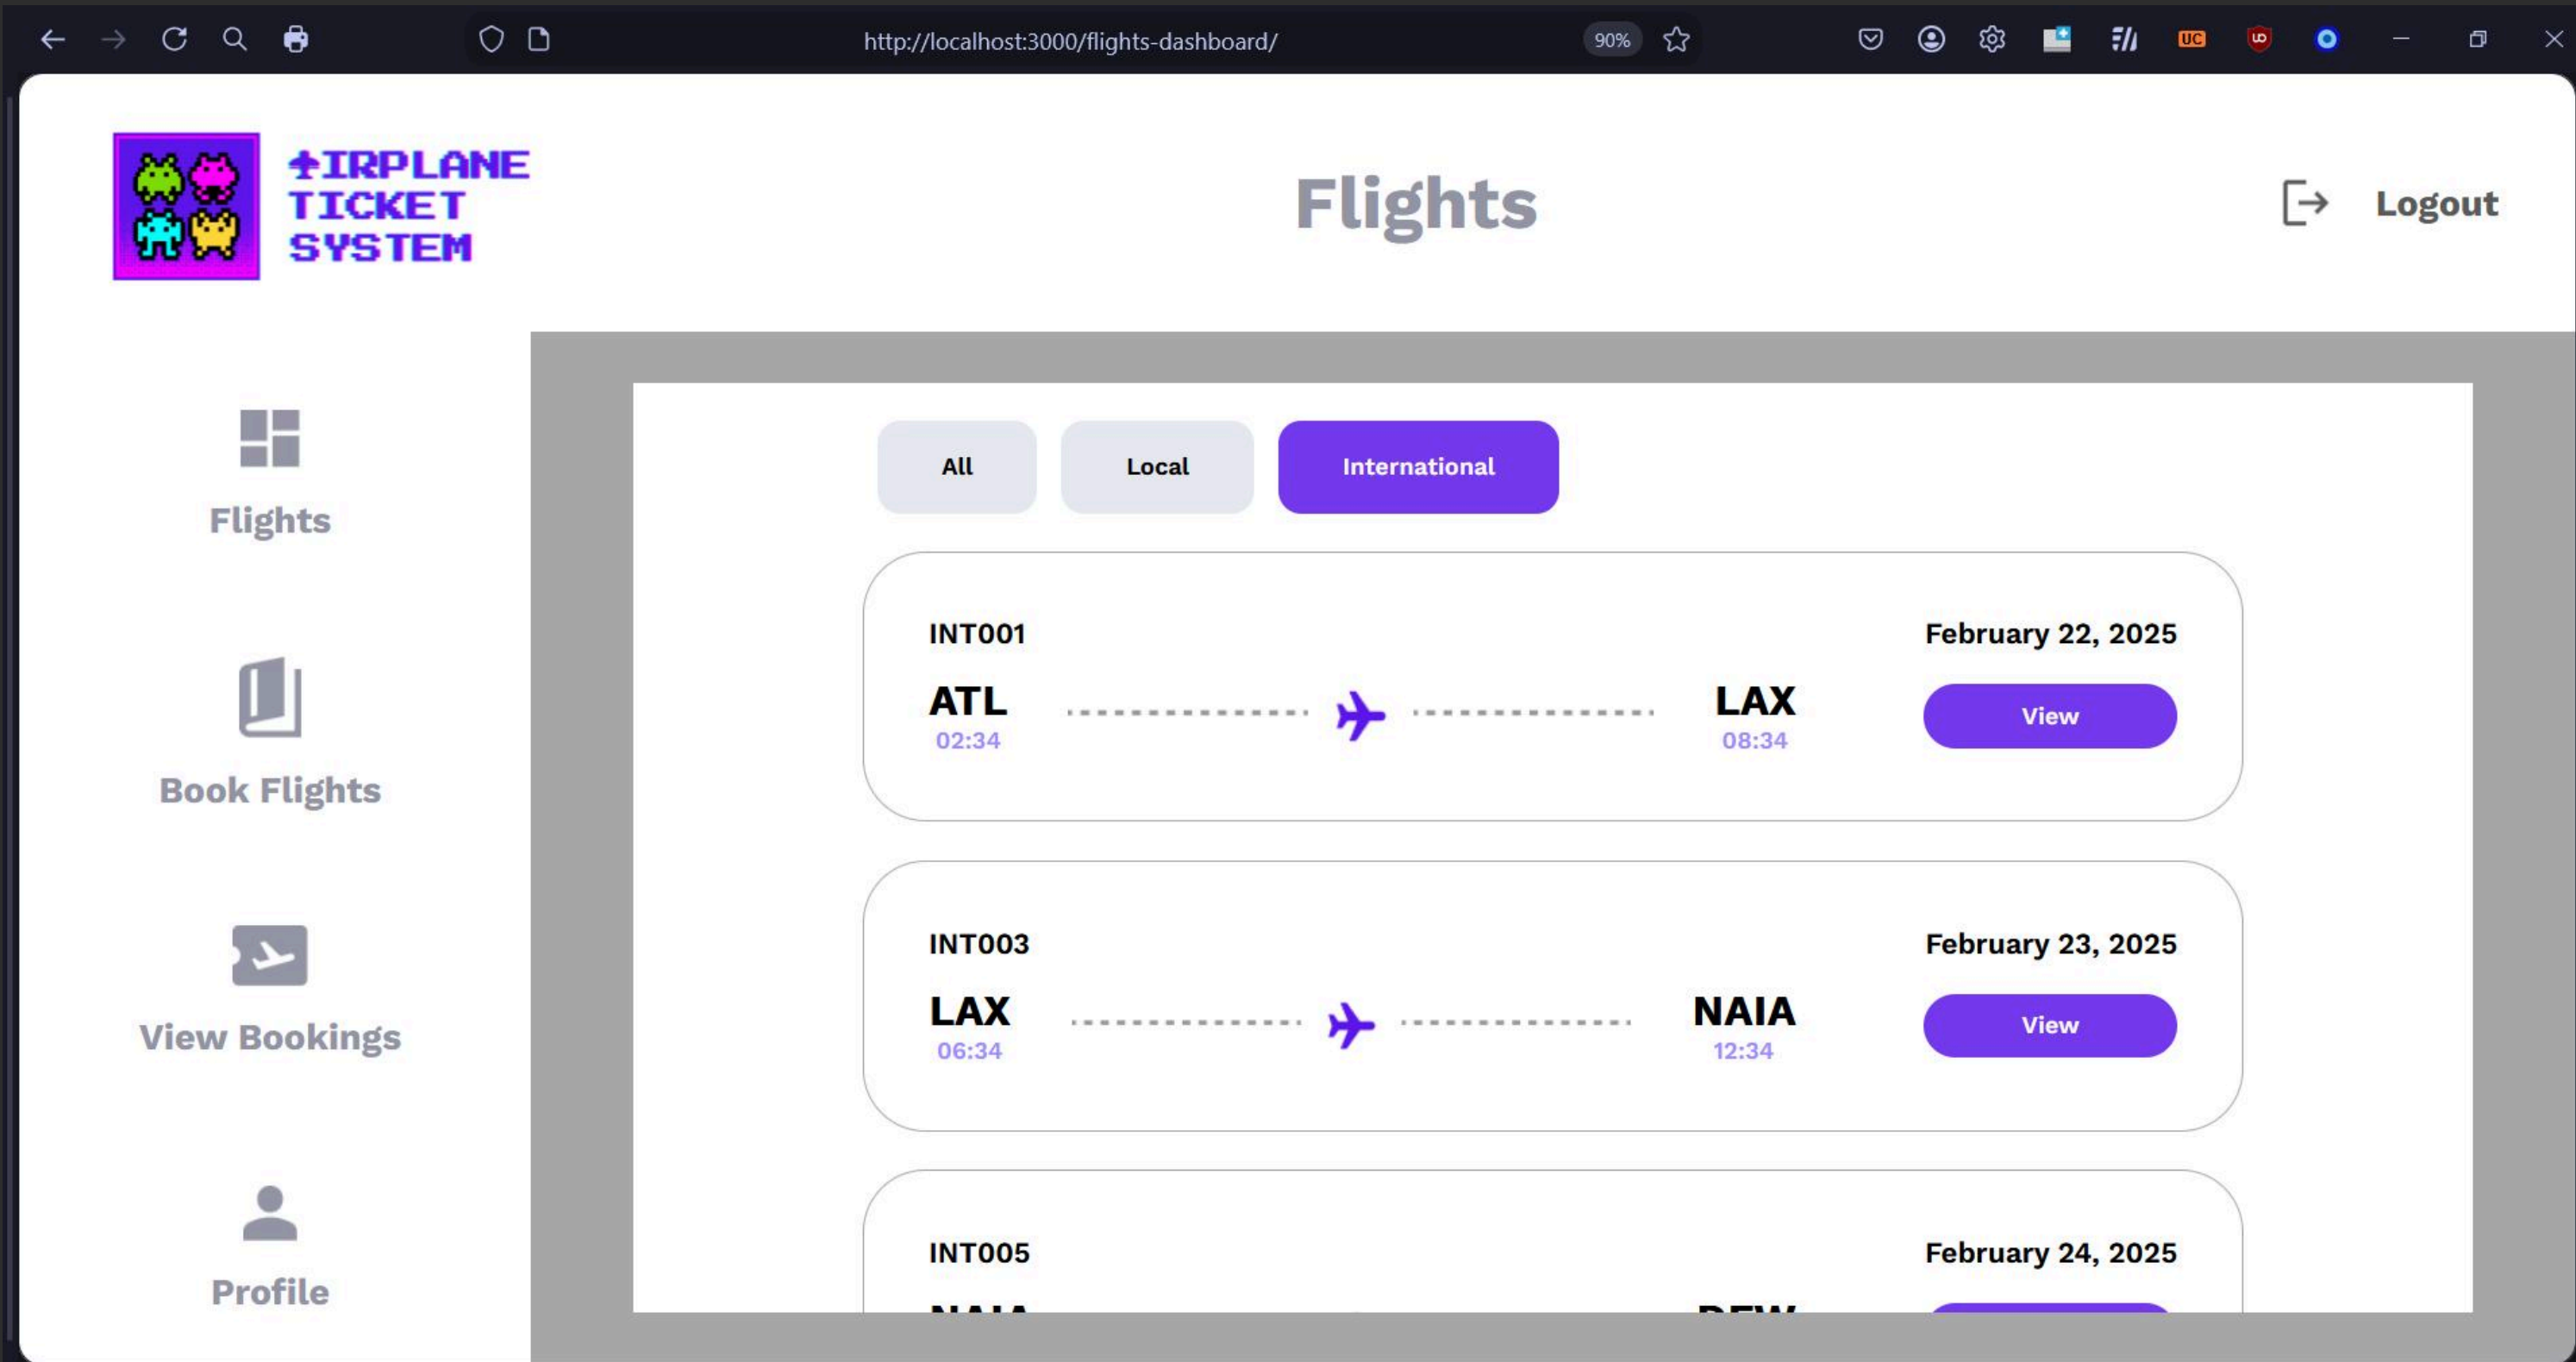

3M's Catering Management System is designed to lessen planning time and scheduling for appointments, this system is programmed using HTML, CSS, JavaScript, PHP and MySQL for data handling

Airplane Ticketing System that my team created during our Object Oriented Programming 2 programmed using C#, and MySQL for data handling

This system is designed to determine the exact denominations of change based on the available cash in the register. It is programmed in Python.

Migrated the Airplane Ticketing System to a different tech stack, ReactJS, MySQL, ExpressJS, and NodeJS was used. this is still a work in progress
